

# ARCHITECTURAL FEATURE OF THE MOMENT...WINDOW SEATS

DESIGNING BUILT-IN SEATING INTO YOUR FLOOR PLAN HAS PLENTY OF PRACTICAL AND AESTHETIC BENEFITS - HERE'S HOW TO CREATE THE PERFECT SPOT

# 1 INSIDE OUT

Amos Goldreich Architecture unlocked the potential of this Victorian house by introducing a side and rear extension to re-jig the space. The window seat is one of the key design features and was a must-have for the homeowners. The window structure itself projects out over the fish pond, creating the feeling that even when you're sitting inside, you're in the garden. An oak finish was used internally to maintain continuity with the rest of the materials in the kitchen.
